

# Quick Millions

Selected documentation  
AVPD October 2020

## Introduction

AVPD are proud to announce the opening of their first solo show "Quick Millions" at Galerie MøllerWitt on the new gallery location in Bredgade 67, Copenhagen (DK).

AVPD's exhibition takes Robert Smithson's text and art work Quick Millions as a starting point.

The work Quick Millions holds a special and peculiar position in Smithson's oeuvre and is comprised by odd elements of Science Fiction, glitter and low status industrial materials like plastic and chipboard. Smithson's work creates an interesting blend of conceptual art, minimal art and pop art with a critical edge.

More over Smithson's work was based on a film he never saw, like AVPD now takes their starting point in a work they have never seen and they have created a bastard exhibition that combines ideas and strategies from usually differentiated artistic position like conceptual art, arte povera and pop art through the use of ready made forms, ordinary materials and elements from everyday life.

The exhibition consists of three new series of works: Cast, Glitch and Spray.

Cast is a number of concrete castings made from found industrialized polystyrene packaging, Glitch is a series of prints, displaying glitches in 3D-renderings of impossible spatial condition and Spray is repetition of a simple painting gesture, that exposes the strata of the paint through a double motive on glass.
